Methods

Theoretical

Classical mechanics
Selective rovibrational energy transfer: A classical trajectory study of collisional energy redistribution in methyl radical, G.S. Peng and R.P. Parson 211 (1996) 17

Many body and quasiparticle approaches
Correlated electronic potential-energy surfaces for proton interactions with N$_2$, F.A. Gianturco, S. Kumar and F. Schneider 211 (1996) 33

Coupling schemes and perturbative treatments
Solvent reorganization energy of electron transfer in weakly polar solvents, D.V. Matyushov 211 (1996) 47
Spin–orbit effects in fullerenes, F.J. Adrian 211 (1996) 73

Equilibrium statistical mechanics
Solvent reorganization energy of electron transfer in weakly polar solvents, D.V. Matyushov 211 (1996) 47
Al,Si ordering in chabazites: A Monte Carlo study, M.C. Gordillo and C.P. Herrero 211 (1996) 81
Maximum entropy imaging and quantum molecular timescale generalized Langevin equation theory, H.K. McDowell and A.M. Clogston 211 (1996) 91

Statistical mechanics of stationary states
The Neel point for spin-transition systems: toward a two-step transition, H. Bolvin 211 (1996) 101

Non-equilibrium thermodynamic and hydrodynamic theories
A Kramers reaction rate theory for electrochemical ion transfer reactions, M.T.M. Koper and W. Schmickler 211 (1996) 123

Ab initio schemes for stationary properties
Correlated electronic potential-energy surfaces for proton interactions with N$_2$, F.A. Gianturco, S. Kumar and F. Schneider 211 (1996) 33
Ab initio calculations of the rovibrational states of He$_2$N$^{2+}$, J.M. Hughes and E.I. von Nagy-Felsobuki

Ab initio MP2 and DFT calculations of geometry and solution tautomerism of purine and some purine derivatives, A. Broo and A. Holmén

The dissociation energies of FeF, FeCl, and FeBr and their positive ions, C.W. Bauschlicher Jr.

Rydberg basis set effects on ab initio second hyperpolarizabilities of H$_2$, C$_6$H$_6$ and CS$_2$ molecules, T. Hamada

Ab initio calculation of three-body interaction in the (H$_2$)$_3$ trimer, P. Wind and I. Røeggen

**Computational and simulation methods**

Selective rovibrational energy transfer: A classical trajectory study of collisional energy redistribution in methyl radical, G.S. Peng and R.P. Parson

Al$_2$Si ordering in chabazites: A Monte Carlo study, M.C. Gordillo and C.P. Herrero

Maximum entropy imaging and quantum molecular timescale generalized Langevin equation theory, H.K. McDowell and A.M. Clogston

The Neel point for spin-transition systems: toward a two-step transition, H. Bolvin

Potential energy curve of the X0$^+$(1Σ$^+$) ground state of HgAr determined from A0$^+$(3Π) → X0$^+$ and B1(3Σ$^+$) → X0$^+$ fluorescence spectra, J. Koperski

The theory of Forster-type migration between clusters of strongly interacting molecules: application to light-harvesting complexes of purple bacteria, V.I. Novoderezhkin and A.P. Razjivin

Experimental and theoretical study of the recombination reaction of FC(O)O radicals, A.E. Croce, C.J. Cobos and E. Castellano

Molecular dynamics simulations of cis--trans isomerization for a proline-containing tripeptide in solution, S.Z. Wan, C.X. Wang, Y.W. Xu and Y.Y. Shi

Magnetic field dependent yield of geminate radical pair recombination in micelles. Effect of intraradical spin lattice relaxation, J.S. Jørgensen, J.B. Pedersen and A.I. Shushin

Optical potential discrete variable representation method applied to the three-dimensional calculations of NeICl predissociation resonances, M. Monnerville and J.-M. Robbe

Stochastic wave packet vs. direct density matrix solution of Liouville–von Neumann equations for photodesorption problems, P. Saalfrank

An improved classical approach quantum encounter treatment of collision-induced vibrational energy transfer. Application to He + CO ($n_i = 1, 2$), N. Marković, T.D. Sewell, S. Nordholm and A. Miklavc

**Molecular dynamics and scattering theory**

Spin–orbit effects in fullerenes, F.J. Adrian

Optical potential discrete variable representation method applied to the three-dimensional calculations of NeICl predissociation resonances, M. Monnerville and J.-M. Robbe

Stochastic wave packet vs. direct density matrix solution of Liouville–von Neumann equations for photodesorption problems, P. Saalfrank

An improved classical approach quantum encounter treatment of collision-induced vibrational energy transfer. Application to He + CO ($n_i = 1, 2$), N. Marković, T.D. Sewell, S. Nordholm and A. Miklavc

An investigation of the photodissociation of molecular oxygen in the 75 to 85 nm region, A.L. Jones, A.J. Blake, L. Torop and D.G. McCoy
Translational spectroscopy of $H^-$ produced by collision induced dissociation of $H_3^+$ on He, H. Martinez and A. Amaya-Tapia

Dynamics of the vibrational mode-specific proton transfer reaction $NH_3^+(\nu_1) + NH_3 \rightarrow NH_2 + NH_4^+$: ab initio MO and classical trajectory studies, H. Tachikawa

A QM/MM simulation method applied to the solution of $Li^+$ in liquid ammonia, T. Kerdcharoen, K.R. Liedl and B.M. Rode

Generalized oscillator strengths for $SF_6$ in the S 2p inner-shell region, Z. Felfli, I. Fomunung, D. Bessis and A.Z. Msezane

**Experimental**

**Magnetic resonances**

Order parameters and carbon shielding tensors of bis-MSB from $^{13}C$ NMR measurements in a nematic liquid crystal, R. Tarroni and C. Zannoni

**Infrared spectroscopy**

Ab initio calculations of the rovibrational states of $He_2N^2+$, J.M. Hughes and E.I. von Nagy-Felsobuki

Multiple absorption and relaxation processes in $SF_6-CH_4$ mixtures: an experimental study, J. Jovanovic-Kurepa, D.D. Markusev and M. Terzic

Infrared spectroscopy of matrix-isolated carbon clusters, with emphasis on $C_8$ and $C_9$, J. Szczepanski, S. Ekern, C. Chapo and M. Vala

Isotope effects in the photochemical formation of HHgCH$_3$ and DHgCD$_3$ in nitrogen and methane matrices, N. Legay-Sommaire and F. Legay

**Visible and UV spectroscopy**

Potential energy curve of the $X0^+(1\Sigma^+)$ ground state of HgAr determined from $A0^+ (3\Pi) \rightarrow X0^+$ and $B1(3\Sigma^+) \rightarrow X0^+$ fluorescence spectra, J. Koperski

An investigation of the photodissociation of molecular oxygen in the 75 to 85 nm region, A.L. Jones, A.J. Blake, L. Torop and D.G. McCoy

Photophysics and photochemistry of $I_2 (D, D')$ in rare gas clusters, K.L. Randall and D.J. Donaldson

Absorption cross section measurements of water vapor in the wavelength region 120 to 188 nm, K. Yoshino, J.R. Esmond, W.H. Parkinson, K. Ito and T. Matsui

Fast-ion beam laser spectroscopy of $^{14}N_2^+$ and $^{15}N_2^+$: high-resolution study of the (1, 2) band of the $B 2\Sigma^+ - X 2\Sigma^+$ system, K. Boudjarane, A. Alikacem and M. Lazzarilli

Pressure effects on the Cl$_2$($D'-A'$) transition at 258 nm, J.B. Nee and S. Hubinger

The orientation of the transition dipole moments of TMA-DPH embedded in a poly(vinylalcohol) film, J.M. Muller, D.H. Harryvan, J.C.D. Verhagen, G. van Ginkel and E.E. van Faassen

**Fluorescence spectroscopy**

Pressure effects on the Cl$_2$($D'-A'$) transition at 258 nm, J.B. Nee and S. Hubinger

The orientation of the transition dipole moments of TMA-DPH embedded in a poly(vinylalcohol) film, J.M. Muller, D.H. Harryvan, J.C.D. Verhagen, G. van Ginkel and E.E. van Faassen

Higher excited-state triplet–singlet intersystem crossing of some organic dyes, S. Reindl and A. Penzkofer

Photophysics of 4-dimethylamino-4′-cyanostilbene and 4-azetidinyl-4′-cyanostilbene. Time-resolved fluorescence and trans–cis photoisomerisation, Yu.V. Il′ichev, W. Kühnle and K.A. Zachariasse

Laser methods
Relaxation and trapping of excitons in J-aggregates of a thiacarbocynine dye, M.A. Drobizhev, M.N. Sapozhnikov, I.G. Scheblykin, O.P. Varnovsky, M. Van der Auweraer and A.G. Vitukhnovsky
Dynamics of geminate charge separation in liquid methycyclohexane studied by the photoassisted ion pair separation technique, F.F. Brazgun, V.A. Nadtochenko, I.V. Rubtsov and L.V. Lukin
Comment on “energy partitioning in photodissociation of methyl, ethyl, and n-propyl iodides at 304 nm”, S.W. North, T.J. Sears, G.E. Hall and T. Suzuki

Picosecond spectroscopy
The theory of Forster-type migration between clusters of strongly interacting molecules: application to light-harvesting complexes of purple bacteria, V.I. Novoderezhkin and A.P. Razjivin
Higher excited-state triplet–singlet intersystem crossing of some organic dyes, S. Reindl and A. Penzkofer
Subpicosecond studies of the solvation dynamics of fluoroprobe in liquid solution, E.R. Middelhoek, H. Zhang, J.W. Verhoeven and M. Glasbeek

Non-linear optical spectroscopy
Higher excited-state triplet–singlet intersystem crossing of some organic dyes, S. Reindl and A. Penzkofer
Dissociation constants of some substituted cinnamic acids in protic solvents: measurements by hyper-Rayleigh scattering and potentiometric techniques, P.C. Ray, N. Munichandraiah and P.K. Das

Optoacoustic spectroscopy
Multiple absorption and relaxation processes in SF6–CH4 mixtures: an experimental study, J. Jovanovic-Kurepa, D.D. Markusev and M. Terzic

Time-resolved experiments
Experimental and theoretical study of the recombination reaction of FC(O)O radicals, A.E. Croce, C.J. Cobos and E. Castellano
Photophysics of 4-dimethylamino-4′-cyanostilbene and 4-azetidinyl-4′-cyanostilbene. Time-resolved fluorescence and trans–cis photoisomerisation, Yu.V. Il′ichev, W. Kühnle and K.A. Zachariasse
Dynamics of geminate charge separation in liquid methycyclohexane studied by the photoassisted ion pair separation technique, F.F. Brazgun, V.A. Nadtochenko, I.V. Rubtsov and L.V. Lukin
Subpicosecond studies of the solvation dynamics of fluoroprobe in liquid solution, E.R. Middelhoek, H. Zhang, J.W. Verhoeven and M. Glasbeek
Mass spectrometry
Translational spectroscopy of H⁻ produced by collision induced dissociation of H₃⁺ on He, H. Martinez and A. Amaya-Tapia
Comment on "energy partitioning in photodissociation of methyl, ethyl, and n-propyl iodides at 304 nm", S.W. North, T.J. Sears, G.E. Hall and T. Suzuki

Measurement of macroscopic variables
Solvent effects on sol–gel transition of alginate solutions by addition of cupric ions, H. Zheng, K. Jiang, Q. Zhang and J. Wang

Objects

Bulk systems

Gases
Correlated electronic potential-energy surfaces for proton interactions with N₂, F.A. Gianturco, S. Kumar and F. Schneider
Optical potential discrete variable representation method applied to the three-dimensional calculations of NeCl predissociation resonances, M. Monnerville and J.-M. Robbe
An investigation of the photodissociation of molecular oxygen in the 75 to 85 nm region, A.L. Jones, A.J. Blake, L. Torop and D.G. McCoy
Dynamics of the vibrational mode-specific proton transfer reaction NH₃⁺(ν₁) + NH₃ → NH₂ + NH₄⁺: ab initio MO and classical trajectory studies, H. Tachikawa
Multiple absorption and relaxation processes in SF₆–CH₄ mixtures: an experimental study, J. Jovanovic-Kurepa, D.D. Markusev and M. Terzic
Absorption cross section measurements of water vapor in the wavelength region 120 to 188 nm, K. Yoshino, J.R. Esmond, W.H. Parkinson, K. Ito and T. Matsui
Fast-ion beam laser spectroscopy of ¹⁴N₂⁺ and ¹⁵N₂⁺: high-resolution study of the (1, 2) band of the B²Σ⁺−X²Σ⁺ system, K. Boudjarane, A. Alikacem and M. Larzilliére

Supersonic beams
Ab initio calculations of the rovibrational states of He₂N₀⁺, J.M. Hughes and E.I. von Nagy-Felsobuki
Potential energy curve of the X0⁺(Σ⁺) ground state of HgAr determined from A0⁺(3Π) → X0⁺ and B1(3 Σ⁺) → X0⁺ fluorescence spectra, J. Koperski

Liquids neat
Photophysics of 4-dimethylamino-4'-cyanostilbene and 4-azetidinyl-4'-cyanostilbene. Time-resolved fluorescence and trans–cis photoisomerisation, Yu.V. Il'ichev, W. Kühnle and K.A. Zachariasse

Liquid mixtures and solutions
Solvent reorganization energy of electron transfer in weakly polar solvents, D.V. Matyuushov
A QM/MM simulation method applied to the solution of Li⁺ in liquid ammonia, T. Kerdcharoen, K.R. Liedl and B.M. Rode
Subpicosecond studies of the solvation dynamics of fluoro probe in liquid solution, E.R.

Dissociation constants of some substituted cinnamic acids in protic solvents: measurements
by hyper-Rayleigh scattering and potentiometric techniques, P.C. Ray, N. Munichandra-
iah and P.K. Das 211 (1996) 499

Crystals
Al,Si ordering in chabazites: A Monte Carlo study, M.C. Gordillo and C.P. Herrero 211 (1996) 81
Stochastic wave packet vs. direct density matrix solution of Liouville–von Neumann
equations for photodesorption problems, P. Saalfrank 211 (1996) 265

Liquid crystals
Order parameters and carbon shielding tensors of bis-MSB from 13C NMR measurements
in a nematic liquid crystal, R. Tarroni and C. Zannoni 211 (1996) 337

Thin films
The orientation of the transition dipole moments of TMA-DPH embedded in a poly(vinyl-
van Faassen 211 (1996) 413

Low-dimensional materials
Relaxation and trapping of excitons in J-aggregates of a thiacarbocynine dye, M.A.
Drobizhev, M.N. Sapozhnikov, I.G. Scheblykin, O.P. Varnavsky, M. Van der Auweraer
and A.G. Vitukhnovsky 211 (1996) 455

Plasmas
Monte Carlo simulation studies on the validity of the Gram–Charlier calculations of
velocity distributions of Na+ swarm in neon gas, P.P. Ong and M.-M. Li 211 (1996) 115

Biological systems
Ab initio MP2 and DFT calculations of geometry and solution tautomerism of purine and
some purine derivatives, A. Broo and A. Holmén 211 (1996) 147
The theory of Forster-type migration between clusters of strongly interacting molecules:
application to light-harvesting complexes of purple bacteria, V.I. Novoderezkin and
A.P. Razjivin 211 (1996) 203
Molecular dynamics simulations of cis–trans isomerization for a proline-containing tripep-
Solvent effects on sol–gel transition of alginate solutions by addition of cupric ions, H.

Microscopic systems

Molecules (neutral and ionic)
Magnetic field dependent yield of geminate radical pair recombination in micelles. Effect
of intraradical spin lattice relaxation, J.S. Jørgensen, J.B. Pedersen and A.I. Shushin 211 (1996) 235
Translational spectroscopy of H\textsuperscript{−} produced by collision induced dissociation of H\textsubscript{2}\textsuperscript{+} on H, H. Martinez and A. Amaya-Tapia

Dynamics of the vibrational mode-specific proton transfer reaction NH\textsubscript{3}\textsuperscript{+}(ν\textsubscript{1}) + NH\textsubscript{3} = NH\textsubscript{2} + NH\textsubscript{4}\textsuperscript{+}; ab initio MO and classical trajectory studies, H. Tachikawa

Generalized oscillator strengths for SF\textsubscript{6} in the S 2\textp{p} inner-shell region, Z. Felfli, I. Fomunung, D. Bessis and A.Z. Msezane

Dissociation constants of some substituted cinnamic acids in protic solvents: measurements by hyper-Rayleigh scattering and potentiometric techniques, P.C. Ray, N. Munichandraiah and P.K. Das

-diatomics

The dissociation energies of FeF, FeCl, and FeBr and their positive ions, C.W. Bauschlicher Jr.

Rydberg basis set effects on ab initio second hyperpolarizabilities of H\textsubscript{2}, C\textsubscript{6}H\textsubscript{6} and CS\textsubscript{2} molecules, T. Hamada

An investigation of the photodissociation of molecular oxygen in the 75 to 85 nm region, A.L. Jones, A.J. Blake, L. Torop and D.G. McCoy

Photophysics and photochemistry of I\textsubscript{2} (D, D') in rare gas clusters, K.L. Randall and D.J. Donaldson

Fast-ion beam laser spectroscopy of \textsuperscript{14}N\textsubscript{2} and \textsuperscript{15}N\textsubscript{2}: high-resolution study of the (1, 2) band of the B\textsuperscript{2}Σ\textsubscript{u}\textsuperscript{+} = X\textsuperscript{2}Σ\textsubscript{g} system, K. Boudjarane, A. Alikacem and M. Larzillière

-small polyatomics

Transport coefficients for NO\textsuperscript{+} ions in helium gas: a test of the NO\textsuperscript{+}—He interaction potential, L.A. Viehland, A.S. Dickinson and R.G.A.R. Maclagan

Selective rovibrational energy transfer: A classical trajectory study of collisional energy redistribution in methyl radical, G.S. Peng and R.P. Parson

Rydberg basis set effects on ab initio second hyperpolarizabilities of H\textsubscript{2}, C\textsubscript{6}H\textsubscript{6} and CS\textsubscript{2} molecules, T. Hamada

Dynamics of the vibrational mode-specific proton transfer reaction NH\textsubscript{3}\textsuperscript{+}(ν\textsubscript{1}) + NH\textsubscript{3} = NH\textsubscript{2} + NH\textsubscript{4}\textsuperscript{+}; ab initio MO and classical trajectory studies, H. Tachikawa

Multiple absorption and relaxation processes in SF\textsubscript{6}—CH\textsubscript{4} mixtures: an experimental study, J. Jovanovic-Kurepa, D.D. Markusev and M. Terzic

Absorption cross section measurements of water vapor in the wavelength region 120 to 188 nm, K. Yoshino, J.R. Esmond, W.H. Parkinson, K. Ito and T. Matsui

Comment on “energy partitioning in photodissociation of methyl, ethyl, and n-propyl iodides at 304 nm”, S.W. North, T.J. Sears, G.E. Hall and T. Suzuki

-aromatics

Solvent reorganization energy of electron transfer in weakly polar solvents, D.V. Matyushov

Spin–orbit effects in fullerenes, F.J. Adrian

Rydberg basis set effects on ab initio second hyperpolarizabilities of H\textsubscript{2}, C\textsubscript{6}H\textsubscript{6} and CS\textsubscript{2} molecules, T. Hamada

-other large

-polymeric and biological
Ab initio MP2 and DFT calculations of geometry and solution tautomerism of purine and some purine derivatives, A. Broo and A. Holmén 211 (1996) 147

Molecular aggregates

-van der Waals molecules
Ab initio calculation of three-body interaction in the (H₂)₃ trimer, P. Wind and I. Roeggen 211 (1996) 179
Potential energy curve of the X0⁺(³Σ⁺) ground state of HgAr determined from A0⁺(³Π) → X0⁺ and B1(³Σ⁺) → X0⁺ fluorescence spectra, J. Koperski 211 (1996) 191
Optical potential discrete variable representation method applied to the three-dimensional calculations of NeCl predissociation resonances, M. Monnervi and J.-M. Robbe 211 (1996) 249

-clusters
Infrared spectroscopy of matrix-isolated carbon clusters, with emphasis on C₈ and C₉, J. Szczepanski, S. Ekern, C. Chapo and M. Vala 211 (1996) 359
Photophysics and photochemistry of I₂ (D, D') in rare gas clusters, K.L. Randall and D.J. Donaldson 211 (1996) 377

Free radicals (including hydronium and muonium)

Ions and charge carriers
A Kramers reaction rate theory for electrochemical ion transfer reactions, M.T.M. Koper and W. Schmickler 211 (1996) 123
Dynamics of geminate charge separation in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, F.F. Brazgun, V.A. Nadtochenko, I.V. Rubtsov and L.V. Lukin 211 (1996) 469
Phenomena

Molecular structure
Spin–orbit effects in fullerenes, F.J. Adrian 211 (1996) 73
Ab initio calculations of the rovibrational states of He₂N^2+, J.M. Hughes and E.I. von Nagy-Felsobuki 211 (1996) 135
Ab initio MP2 and DFT calculations of geometry and solution tautomerism of purine and some purine derivatives, A. Broo and A. Holmén 211 (1996) 147
The dissociation energies of FeF, FeCl, and FeBr and their positive ions, C.W. Bauschlicher Jr. 211 (1996) 163
Potential energy curve of the X0+(^1Σ^+) ground state of HgAr determined from A0+(^3Π) → X0^+ and B1(^3Σ^+) → X0^+ fluorescence spectra, J. Koperski 211 (1996) 191

Vibrations and rotations of molecules
Selective rovibrational energy transfer: A classical trajectory study of collisional energy redistribution in methyl radical, G.S. Peng and R.P. Parson 211 (1996) 17
Ab initio calculations of the rovibrational states of He₂N^2+, J.M. Hughes and E.I. von Nagy-Felsobuki 211 (1996) 135
Infrared spectroscopy of matrix-isolated carbon clusters, with emphasis on C₈ and C₉, J. Szczepanski, S. Ekern, C. Chapo and M. Vala 211 (1996) 359
Fast-ion beam laser spectroscopy of ^14N²⁺ and ^15N²⁺: high-resolution study of the (1, 2) band of the B ^2Σ^+_g–X ^2Σ^+_g system, K. Boudjarane, A. Alikacem and M. Larzillièr 211 (1996) 393

Electronic structure and states
Correlated electronic potential-energy surfaces for proton interactions with N₂, F.A. Gianturco, S. Kumar and F. Schneider 211 (1996) 33
Pressure effects on the Cl₂(D′–A) transition at 258 nm, J.B. Nee and S. Hubinger 211 (1996) 403

Electric and magnetic properties
Spin–orbit effects in fullerenes, F.J. Adrian 211 (1996) 73

Molecular interactions
Ab initio calculation of three-body interaction in the (H₂)₃ trimer, P. Wind and I. Røeggen 211 (1996) 179
Order parameters and carbon shielding tensors of bis-MSB from ^13C NMR measurements in a nematic liquid crystal, R. Tarroni and C. Zannoni 211 (1996) 337
Photophysics and photochemistry of I₂ (D, D′) in rare gas clusters, K.L. Randall and D.J. Donaldson 211 (1996) 377
Spectral bandshapes and intensities
Maximum entropy imaging and quantum molecular timescale generalized Langevin equation theory, H.K. McDowell and A.M. Clogston
Absorption cross section measurements of water vapor in the wavelength region 120 to 188 nm, K. Yoshino, J.R. Esmond, W.H. Parkinson, K. Ito and T. Matsui

Coupling of electronic and nuclear motion
Stochastic wave packet vs. direct density matrix solution of Liouville–von Neumann equations for photodesorption problems, P. Saalfrank
An investigation of the photodissociation of molecular oxygen in the 75 to 85 nm region, A.L. Jones, A.J. Blake, L. Torop and D.G. McCoy
Relaxation and trapping of excitons in J-aggregates of a thiacarbocynine dye, M.A. Drobizhev, M.N. Sapozhnikov, I.G. Scheblykin, O.P. Varnavsky, M. Van der Auweraer and A.G. Vitukhnovsky

Energy transfer processes
Selective rovibrational energy transfer: A classical trajectory study of collisional energy redistribution in methyl radical, G.S. Peng and R.P. Parson
Correlated electronic potential-energy surfaces for proton interactions with N₂, F.A. Gianturco, S. Kumar and F. Schneider
The theory of Forster-type migration between clusters of strongly interacting molecules: application to light-harvesting complexes of purple bacteria, V.I. Novoderezhkin and A.P. Razjivin
An improved classical approach quantum encounter treatment of collision-induced vibrational energy transfer. Application to He + CO (nᵢ = 1, 2), N. Marković, T.D. Sewell, S. Nordholm and A. Miklavc
Translational spectroscopy of H⁻ produced by collision induced dissociation of H₅⁺ on He, H. Martinez and A. Amaya-Tapia

Molecular photophysical processes
Higher excited-state triplet–singlet intersystem crossing of some organic dyes, S. Reindl and A. Penzkofer

Intramolecular dynamics
Molecular dynamics simulations of cis–trans isomerization for a proline-containing tripeptide in solution, S.Z. Wan, C.X. Wang, Y.W. Xu and Y.Y. Shi
Optical potential discrete variable representation method applied to the three-dimensional calculations of NeCl predissociation resonances, M. Monnerville and J.-M. Robbe

-radiationless transitions
Optical potential discrete variable representation method applied to the three-dimensional calculations of NeCl predissociation resonances, M. Monnerville and J.-M. Robbe

Luminescence spectra, yields and lifetimes
Photophysics of 4-dimethylamino-4'-cyanostilbene and 4-azetidinyl-4'-cyanostilbene. Time-resolved fluorescence and trans–cis photoisomerisation, Yu.V. Il'ichev, W. Kühnle and K.A. Zachariasse
**Subject index to volume 211**

**Non-linear responses (including optical)**

Rydberg basis set effects on ab initio second hyperpolarizabilities of $\text{H}_2$, $\text{C}_6\text{H}_6$ and $\text{CS}_2$ molecules, T. Hamada

Dissociation constants of some substituted cinnamic acids in protic solvents: measurements by hyper-Rayleigh scattering and potentiometric techniques, P.C. Ray, N. Munichandraiah and P.K. Das

211 (1996) 171

211 (1996) 499

**Reactions (including dissociation)**

Experimental and theoretical study of the recombination reaction of $\text{FC(OC)}$ radicals, A.E. Croce, C.J. Cobos and E. Castellano

Dynamics of the vibrational mode-specific proton transfer reaction $\text{NH}_3^+(\nu_1) + \text{NH}_3 \rightarrow \text{NH}_2 + \text{NH}_4^+$: ab initio MO and classical trajectory studies, H. Tachikawa

211 (1996) 215

211 (1996) 305

**-gas phase**

Experimental and theoretical study of the recombination reaction of $\text{FC(OC)}$ radicals, A.E. Croce, C.J. Cobos and E. Castellano

Dynamics of the vibrational mode-specific proton transfer reaction $\text{NH}_3^+(\nu_1) + \text{NH}_3 \rightarrow \text{NH}_2 + \text{NH}_4^+$: ab initio MO and classical trajectory studies, H. Tachikawa

Pressure effects on the $\text{Cl}_2(D'-A')$ transition at 258 nm, J.B. Nee and S. Hubinger

Comment on "energy partitioning in photodissociation of methyl, ethyl, and $n$-propyl iodides at 304 nm", S.W. North, T.J. Sears, G.E. Hall and T. Suzuki

211 (1996) 215

211 (1996) 305

211 (1996) 403

211 (1996) 515

**-condensed phase**

A Kramers reaction rate theory for electrochemical ion transfer reactions, M.T.M. Koper and W. Schmickler

Isotope effects in the photochemical formation of $\text{HHgCH}_3$ and $\text{DHgCD}_3$ in nitrogen and methane matrices, N. Legay-Sommaire and F. Legay

Dissociation constants of some substituted cinnamic acids in protic solvents: measurements by hyper-Rayleigh scattering and potentiometric techniques, P.C. Ray, N. Munichandraiah and P.K. Das

211 (1996) 123

211 (1996) 367

211 (1996) 499

**-photochemical**

Photophysics and photochemistry of $I_2 (D, D')$ in rare gas clusters, K.L. Randall and D.J. Donaldson

Photophysics of 4-dimethylamino-4'-cyanostilbene and 4-azetidinyl-4'-cyanostilbene. Time-resolved fluorescence and trans–cis photoisomerisation, Yu.V. Il'ichev, W. Kühnle and K.A. Zachariasse

Dynamics of geminate charge separation in liquid methycyclohexane studied by the photoassisted ion pair separation technique, F.F. Brazgun, V.A. Nadtochenko, I.V. Rubtsov and L.V. Lukin

Comment on "energy partitioning in photodissociation of methyl, ethyl, and $n$-propyl iodides at 304 nm", S.W. North, T.J. Sears, G.E. Hall and T. Suzuki

211 (1996) 377

211 (1996) 441

211 (1996) 469

211 (1996) 515

**Electron transfer**

Solvent reorganization energy of electron transfer in weakly polar solvents, D.V. Matyushov

A Kramers reaction rate theory for electrochemical ion transfer reactions, M.T.M. Koper and W. Schmickler

211 (1996) 47

211 (1996) 123
Ionization (including Rydberg states)
The dissociation energies of FeF, FeCl, and FeBr and their positive ions, C.W. Bauschlicher Jr.

Dynamics of geminate charge separation in liquid methylcyclohexane studied by the photoassisted ion pair separation technique, F.F. Brazgun, V.A. Nadtochenko, I.V. Rubtsov and L.V. Lukin

Molecular motion (including diffusive)
Monte Carlo simulation studies on the validity of the Gram—Charlier calculations of velocity distributions of Na⁺ swarm in neon gas, P.P. Ong and M.-M. Li
Magnetic field dependent yield of geminate radical pair recombination in micelles. Effect of intraradical spin lattice relaxation, J.S. Jorgensen, J.B. Pedersen and A.I. Shushin
Subpicosecond studies of the solvation dynamics of fluoroprobe in liquid solution, E.R. Middelhoek, H. Zhang, J.W. Verhoeven and M. Glasbeek

Isotopic effects
Isotope effects in the photochemical formation of HHgCH₃ and DHgCD₃ in nitrogen and methane matrices, N. Legay-Sommaire and F. Legay

Collective motion and excitations
Relaxation and trapping of excitons in J-aggregates of a thiacarbocynine dye, M.A. Drobitshev, M.N. Sapozhnikov, I.G. Scheblykin, O.P. Varnavsky, M. Van der Auweraer and A.G. Vitukhnovsky

Surface effects and catalysis
Stochastic wave packet vs. direct density matrix solution of Liouville—von Neumann equations for photodesorption problems, P. Saalfrank

Thermodynamic and transport properties
Maximum entropy imaging and quantum molecular timescale generalized Langevin equation theory, H.K. McDowell and A.M. Clogston
Monte Carlo simulation studies on the validity of the Gram—Charlier calculations of velocity distributions of Na⁺ swarm in neon gas, P.P. Ong and M.-M. Li
The dissociation energies of FeF, FeCl, and FeBr and their positive ions, C.W. Bauschlicher Jr.

Structure of solids and liquids
Al,Si ordering in chabazites: A Monte Carlo study, M.C. Gordillo and C.P. Herrero
A QM/MM simulation method applied to the solution of Li⁺ in liquid ammonia, T. Kerdcharoen, K.R. Liedl and B.M. Rode

Phase transitions
The Neel point for spin-transition systems: toward a two-step transition, H. Bolvin
Solvent effects on sol—gel transition of alginate solutions by addition of cupric ions, H. Zheng, K. Jiang, Q. Zhang and J. Wang
